

## ACCESSIBILITY PROJECT CONSULTANT – ENTRY LEVEL

### Company Background

Code Consultants, Inc. (CCI) is an internationally recognized fire protection, life safety, and accessibility consulting firm. CCI is seeking experienced professionals in the field of **accessibility compliance** to join either our Los Angeles, CA or New York City, NY office.

Founded in 1973, CCI is an industry leader, providing a diverse range of in-depth accessibility consultation services, including but not limited to:

- Inspection of existing sites
- Inspection of new construction
- Inspection for barrier removal compliance
- Inspection for ADA, FHA, or IBC compliance
- Plan review services
- Analysis of equivalent facilitations
- Meetings with advocacy groups
- Meetings with City and State officials

CCI's experienced and trained team of over 80 professionals consist of fire protection engineers, architects, civil/mechanical/electrical engineers, code officials and members of the fire service. At CCI, we value our team members and continuously strive to provide a great culture, career and personal development opportunities.

As a privately held firm, CCI's management team is fully responsible for the strategic direction of the firm and successfully manages growth by maintaining a stable organizational structure, consistent professional service products across our offices, and applying objective performance-based compensation.

### Job Description Summary

Responsibilities will include working on a wide variety of projects regarding accessibility code compliance throughout the country. The candidate should expect to have daily interactions with clients and be willing to learn accessibility code requirements and accessibility compliance strategies. Our employees are self-motivated and able to quickly engage in project assignments.

### Qualifications

The ideal candidate will have an undergraduate degree, preferably in Architectural Engineering, Communications, Construction Management, or any STEM or architectural related discipline.

Candidates must possess the skills to build a strong knowledge of current federal and state laws and regulations pertaining to accessibility in the built environment through plan review efforts, inspections, and surveys. A basic knowledge of accessibility and/or construction is a plus.

Candidates need to be capable of working independently, have excellent written and verbal communication skills, and be motivated by growth opportunities for themselves and CCI.

### Training

CCI will provide complete on the job training for the successful candidate.

### Compensation

CCI offers an excellent salary with a performance-based bonus program, benefits (including 401(k) with matching contributions, health, dental, vision, life and disability plans) and generous vacation leave.

### Contact

Interested and qualified candidates, please send your resume to CCI's Human Resources Department at [HR@CodeConsultants.com](mailto:HR@CodeConsultants.com).
